

Name _____

Estimating Sums and Differences

P 1-5

Estimate each answer. Tell which method you used.

1. $32,690 - 8,044$ _____

2. $8,602 + 7,521$ _____

3. $272 + 281 + 264$ _____

4. $60,584 - 48,232$ _____

5. **Number Sense** Think of two numbers whose sum would be about 3,000.

6. Estimate Mr. Musial's income from January through March.

7. Estimate Mr. Musial's income from April through June.

8. Estimate the difference in Mr. Musial's income in March and April.

Mr. Musial's Income

Month	Income
January	\$3,323
February	\$3,706
March	\$4,542
April	\$2,502
May	\$3,809
June	\$3,238

Test Prep

9. Which shows the estimation of $23,486 + 9,227 + 196$ using front-end estimation with adjusting?

A. 32,000

B. 33,000

C. 34,000

D. 35,000

10. **Writing in Math** Describe a situation in which it would be better to overestimate than underestimate.
